PROJECT

Early Prediction in Liver Diseases - Machine Learning Project

- Developed a machine learning-based system for early prediction of liver diseases using patient health datasets.
- Performed data preprocessing, cleaning, and feature selection to improve model accuracy and reliability.
- Applied classification algorithms to analyze medical parameters and predict the risk of liver disease at an early stage.
- Evaluated model performance using accuracy metrics and fine-tuned the model for better prediction results.
- Collaborated with dataset insights to improve model understanding and support early medical decision-making.

CORE COMPETENCIES

- Text, Image, Audio, and Video Annotation
- Data Labeling & Quality Assurance
- Workflow Documentation
- MS Office (Word, Excel, PowerPoint)
- Attention to Detail
- Team Collaboration & Communication
- Deadline Management
